MEDASSETS SUPPLY CHAIN SYSTEMS SIGNS CONTRACT FOR PORTBLUE'S COMMANDAWARE™ AND PRACTICESENSE™ SYSTEMS

LOS ANGELES, Calif. (Jan 31, 2007) -- PortBlue (www.portblue.com), a leading provider of hosted knowledge-based systems, today announced that MedAssets Supply Chain Systems (www.medassets.com), a market leader in the healthcare supply chain management and services, has entered into an agreement with PortBlue to offer the PortBlue's CommandAware™ hospital incident response system and PracticeSense™ medical practice management suite to MedAssets customers throughout the country.

Servicing more than 27,000 acute care hospitals and alternate site facilities nationwide, MedAssets is a comprehensive provider of all aspects of healthcare business needs.

"MedAssets is confident that both CommandAware and PracticeSense address crucial issues confronting hospitals—capacity and disaster management in the case of CommandAware and physician retention and practice performance, in the case of PracticeSense," said Mark B. Miriani, President, Supply Chain Contracting, MedAssets Supply Chain Systems. "Our key goal is to offer 'best practice' solutions that will enhance our customers' institutional stability, quality of patient care and expense management. CommandAware and PracticeSense exemplify these objectives."

"MedAssets has an outstanding reputation for providing access to innovative products and services. We're delighted with our association with MedAssets," said Paul Dimitruk, CEO, PortBlue. "More than ever, it's vital that healthcare organizations have access to solutions across the full scope of their needs, including high-level business guidance. In working with MedAssets, we're looking forward to bringing better solutions to America's healthcare organizations and providers."

CommandAware (www.commandaware.com) offers hospitals best practice guidance in developing a comprehensive incident management plan, built on a resource management platform that can be used in all operational conditions, from everyday hospital capacity management to mass casualty events.

The CommandAware mission is threefold: to ensure that hospitals have a state of the art disaster management plan that complies with best practices and accreditation standards, to give disaster managers the information, work process tools, and resources they need to effectively respond to a full “all hazards” array of incidents, and to ensure that hospitals recover from incidents effectively, tracking vital data to capture lessons learned from both emergency drills and actual incidents so that mistakes are not repeated and process improvements are made.

PracticeSense (www.practicesense.com) is a practice performance software suite that helps physicians and practice managers optimize business and financial outcomes. PracticeSense provides a suite of “modules” addressing key business issues – from payer contract analysis and provider compensation to staffing and collections. PracticeSense will also provide benchmarking reports for peer comparisons and competitive intelligence. PracticeSense is offered to MedAssets Supply Chain Systems’ customers to address key issues at their affiliated practices, whether owned, managed or subsidized.

About PortBlue Corporation

PortBlue Corporation (www.portblue.com) develops and hosts knowledge-based systems in the healthcare sector. The practical know-how of recognized experts is rapidly transformed into web-based training, work process and decision-support tools in the form of PortBlue hosted applications accessible 24/7. PortBlue’s systems mentor and guide users through key tasks and processes to optimal decisions and outcomes.

About MedAssets

MedAssets partners with healthcare providers to improve operating margins and cash flow while supporting quality of care goals. MedAssets implements integrated solutions to address the greatest opportunities for financial and process improvement and drives performance in revenue cycle, supply chain and clinical service line management. MedAssets is a business partner to more than 2,400 hospitals and 25,000 non-acute care healthcare providers. For more information, go to www.medassets.com.
